PROFILE

Third-year Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning at Symbiosis Institute of Technology, Nagpur (CGPA: 8.14). Interested in machine learning, explainable AI, generative AI, and backend development, with hands-on experience building ML workflows, AI-agent applications, and student-led IoT/robotics activities.

EDUCATION

Symbiosis Institute of Technology, Nagpur — Nagpur, Maharashtra

B.Tech. in Computer Science Engineering | Specialization: Artificial Intelligence & Machine Learning

CGPA: 8.14/10 | Third Year

TECHNICAL SKILLS

Programming: Python, C, HTML, CSS, JavaScript

AI/ML: Machine Learning, Data Preprocessing, Feature Engineering, Model Evaluation, scikit-learn, XGBoost, Random Forest, Explainable AI

Generative AI: LLMs, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, AI Agents, Prompt Engineering

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Gradio, Hugging Face

Web & Data: Node.js, REST APIs, SQL, MongoDB, Pandas, NumPy, Matplotlib

INTERNSHIP

AI & ML Intern — Main Crafts Technology

- Worked on practical machine-learning tasks involving data preparation, model development, validation, and performance evaluation.
- Explored regression/classification workflows, feature engineering, hyperparameter tuning, cross-validation, and metrics such as MAE, RMSE, R^2, precision, recall, and F1-score.

PROJECTS

Explainable AI-Driven Stroke Risk Assessment Platform

- Developed a concept for predicting stroke risk and explaining model outputs, with preventive guidance based on influential risk factors.
- Explored machine-learning models and counterfactual-style recommendations to communicate how changes in risk factors may affect predictions.

Parkinson's Disease Prediction Using Machine Learning

- Worked with voice-feature data to build a machine-learning approach for Parkinson's disease prediction and examine influential features.
- Research paper on Parkinson's disease prediction was conditionally accepted by the IJCDS Journal.

AI/ML Model Validation & Tuning

- Practised preprocessing, feature engineering, train/test validation, cross-validation, hyperparameter tuning, and model comparison as part of internship tasks.

CERTIFICATIONS

- Ethical Considerations for Generative AI — IBM SkillsBuild (2025)
- Introduction to Retrieval-Augmented Generation (RAG) — IBM SkillsBuild (2025)
- Introduction to Python Programming; Red Hat Training and Certification (2025)
- Data Science Summer School (2025); Global Immersion Program, AIT Thailand

LEADERSHIP & ACTIVITIES

Coordinator — Smart Tech Club (IoT & Robotics)

- Help coordinate club activities and hands-on workshops introducing IoT, Arduino programming, LED matrices, and robotics concepts.

IEEE Student Chapter / ICSIT 2026

- Contributed to technical workshops and student activities; supported author coordination for online conference sessions.
